Sole Developer
Uses Firebase and Moment.js to have a real-time mock train schedule with the option for users to add their own trains
- Technologies used: HTML5, CSS3, Twitter Bootstrap, Javascript, JQuery, Moment.js, Firebase

EXPERIENCE

Project Manager – *Young Invincibles* – Washington, D.C.   **2017 - Present**
Served as technical and business lead for the Get Covered Connector, a cloud-based, SaaS scheduling and reporting app for Affordable Care Act enrollment assisters. Maintained a portfolio of 10-15 subscribers including hospitals, local government, non-profit and private sector businesses.

Key Accomplishments:

- Managed a team of 2 developers for a 3 month app rebuild with a $120,000 budget that was delivered on time
- Managed and advised a national network of over 200 organizations active across all subscribers, achieving a boost in client satisfaction, and a 25% year-to-year increase in revenue
- Served as in-house technical expert and project manager for a cloud-based SaaS scheduling

Labor Organizer – *Minnesota Nurses Association* – St. Paul, Minnesota.   **2016**
Part of a team of two organizers responsible for a 2,000 union member Hospital during a 7 week long strike. Provided strategic support to bargaining team members and organized regular events to generate publicity. Used state-of-the-art mass SMS sending tools as well as Facebook Groups inform rank-and-file members of key bargaining updates and recruit activists to strategic events

Project Lead – *Enroll America* – Phoenix, AZ and Charleston, SC   **2014, 2015**
Worked with a network of hospitals to implement digital outreach strategies into their Affordable Care Act Open Enrollment marketing campaigns. Helped manage organization-wide shift from consumer-focused outreach to business-focused outreach. Provided regular training for a variety of partners on new technologies to manage scheduling, data entry and other relevant systems.

Freelance Campaign Strategist – *Various Employers* – Iowa, Tennessee, Minnesota   **2012-2015**
Responsible for recruiting hundreds of volunteers across state, federal and local campaigns. Used data reports to determine priority areas for voter contact. Built SMS and Email trees to obtain regular progress reports from volunteers mid-shift and strategically shift resources. Part of a team of 7 responsible for planning a presidential visit in less than 2 weeks.

EDUCATION

University of Minnesota, St. Paul, Minnesota **–** Full Stack Web Development Bootcamp
